

Healing Touch

Cancer Supportive Care Program

Healing Touch is a holistic energy therapy that supports healing on physical, emotional, mental, and spiritual levels. Practitioners use gentle techniques to balance, clear, and energize the human energy field so that an individual's immune system can better support self-healing.

Healing Touch complements traditional cancer therapy and can support a reduction of anxiety, depression, fatigue and nausea, lymphedema and neuropathy. Healing Touch providers are able to connect with clients via phone for sessions. If you have never experienced a Healing Touch session and want to discover the benefits schedule an appointment today.

To schedule a session, or for more information email cscphealingpartners@stanfordhealthcare.org

The Stanford Supportive Care Program provides free classes, workshops, fitness classes, services, and support to all patients regardless of where they receive their care.
