

# Memory Disorders Patient Support Group

## Neuroscience Supportive Care Program

Do you have a diagnosis of Mild Cognitive Impairment or early-stage dementia and seek a supportive environment to connect with others who share similar experiences? This peer support group meets twice a month and provides a safe space for patients to connect with each other for support, problem-solving, and community. The Memory Disorders Patient Group is facilitated by the Stanford Health Care Aging Adult Service's Memory Support Program.

**If interested, please call 650.213.6261 for more information prior to attending.**
