

# Moyamoya Peer 2 Peer Program

## Neuroscience Supportive Care Program

The Moyamoya Peer 2 Peer Mentoring Program offers trained, experienced peer mentors to talk with patients and caregivers about their experiences. Contact can be in person, via phone, text, or email, and frequency depends on your comfort level. All mentors are Stanford volunteers who have been through similar treatment. They have completed training on privacy, navigating the health care system, and how to support others. They have also all completed health screenings and background checks to ensure safety of participants.

For more information, contact your social worker or program coordinator Morgan Gross at 650.474.1011 or [MoGross@stanfordhealthcare.org](mailto:MoGross@stanfordhealthcare.org).

*The Stanford Supportive Care Program provides free classes, workshops, fitness classes, services, and support to all neuroscience patients regardless of where they receive their care.*
