

# EverReady Thursday – Message of the Week

9/19/19

## Safety Culture Survey Results are Available!

The Joint Commission (TJC) requires regular evaluation of the culture of safety in an organization. TJC also requires that organizations prioritize and implement changes identified by the evaluation.

**Leaders:** Debrief with your team on the *Safety Culture Survey* results and refer to debrief resources available on Healthstream. Work with your team to select one domain, theme, or question to improve for FY20. Please follow up with your Quality contact for any additional support or facilitation.

**Staff:** Be on the look out for a debrief session to go over the results.
